## 1. Introduction

ConnectPay – Open a multi-currency IBAN account with ConnectPay and forget having to deal with intermediaries. We're the one-stop-shop for all your payment-related needs, with guaranteed security & stability. Hold your funds risk-free.

Unlike traditional banks, we don't invest your money. We hold all funds at the Central Bank of Lithuania – this means that they're available and ready for withdrawal 24/7/365. Lean on the EU's security standards. We're authorized and regulated by the Central Bank of Lithuania and subject to the European Central Bank's regulatory framework. That's multi-level security that we couldn't crack ourselves even if we wanted.

Document version	Prepared by	What was changed	Date
V1.1.0.	UAB "ConnectPay"	New payment	2022-12-02

## 2. Installation guide

PrestaShop requirements:

- PHP 7.1 or higher
- Prestashop 1.6.1.20 or higher
- A ConnectPay Online Banking account
- An SSL certificate for your web store

To install ConnectPay plugin, you'll need to log in to your BackOffice, navigate to **Modules -> Modules manager menu** page, click on upload a module (Image 1.1.), dialog box will appear.

🚯 Upload a module

#### Image 1.1

Drag & drop connectpay.zip file in to Upload a module dialog. You will receive **Module Installed!** Success message (Image 1.2.):

Upload a module	0
$\checkmark$	
Module installed!	
EDMFFIGURE	

Another way of installation is to use **FTP Way**. Download connectpay.zip file to your computer, then extract it, upload ConnectPay folder into PrestaShop modules directory. After that, log in to your BackOffice, navigate to **Modules -> Modules catalog menu** page, type module name in the search (ConnectPay), hit the **Install** button to finish installation.

## 3. How to find a module in your e-commerce?

After the installation you will be able to go to configure straight from pop-up, however if you want to come back later there will be no pop-up.

For the main **ConnectPay** plugin configuration page you need to visit **Modules -> Module manager** (Image 3.1). **->** Type "ConnectPay" in the search field at the top of Module manager page (Image 3.2).

Another place where you can find our module is selecting **Payments -> Payment methods** and there you will see (if **ConnectPay** plugin is activated) **ConnectPay** payment method in payment methods list (Image 3.3).

Payment > Payment Payment	Payment Methods Payment Methods							
Active pa	yment							
20	Cash on delwery (COD) v2.0.1 - by PrestaShop Accept cash payments on delivery to make it easy for customers to purchase on your store.							
	Payments by check v2.0.5 - by PrestaShop This module allows you to accept payments by check.	Configure						
<b>≦</b> ∎	Bank transfer v2.1.3 - by PrestaShop Accept wire payments by displaying your account details during the checkout.	Configure						
СР	ConnectPay v1.1.0 - by ConnectPay ConnectPay Accept Payments module allows collecting all types of payments. Easily you could manage everything with one ConnectPay account.	Configure						
Image 3.3								

You can enable it on this page or on plugin's configuration page. To configure **ConnectPay** payment gateway click "**Configure**" button next to it.

#### 4. How to configure your module?

When you opened our module, please enter your credentials in "Set up" TAB, and configure basic features (Image 4.1).

Devel	
up Payn	nenis Logs
	Module set up
	and and account of account of a statement of a
	ClientID / Client Secret / BrandID from ConnectPay system
	Your Devidp identity will be validated via set of ordentials - API Key (ClientID), API Secret (Client Secret) and Brandlo. These ordentials will be provided to you by Connectpay
	Clert ID
	Client Secret
	Brand ID
	Private Key generation
	These credentials will be provided to you by Connectlay Contendary
	Sections a file

	IS UNE?
	How to set CronJob for Orders State Update.
	Set Cronjob for ConnectPay orders state update: */5 *** * wget http://prestashop-stage.connectpay.biz/index.php?token=1e1cc771a1aedbf9b75272b4dd317ecc&fc=module&module&connectpay&controller=updateOrderState&id_lang=2

- Client ID is provided to you after you sign a contract with us.
- Client secret is provided to you after you sign a contract with us.
- Private key is provided to you after you sign a contract with us, please don't change the format and upload exactly as you got it from us.
- BrandID is provided to you after you sign a contract with us.
- Payment methods payment methods for the customers to pay within the E-Shop. CARD payment method by debit/credit card (MasterCard or Visa). If you have a contract only for payment initiation service, before enabling Cards, please contact your account executive for your contract change. Bank transfer payment initiation service, which allows to pay via payment provider (bank);
- IS LIVE? this selection controls environments. If enabled, then production environment is used, if disabled, then – stage environment is used.
- Cron job set up this field provides the cronjob which can be set in your PrestaShop to automatically change the order states, when an order is paid, or the status needs to be changed for e.g. if the order is refunded, or the payment was approved by ConnectPay.

After the fields are filled out, be sure to press "Connect" to save your details input.

When trying to save, if some required fields, are missing, you will be presented with an error, at the top of the page, stating which fields are missing, and are needed, for e.g. (Image 4.2):

Image 4.2

In the payments tab, you can change payment options rendering method (Image 4.3):

Display providers in FO configuration						
	Display all banks This option allows you to choose how banks are displayed in the FO. Display All Banks No					
Save						

Image 4.3

Also, you can Load all enabled by ConnectPay providers for specific country and Enable/Disable them in your store (Image 4.4):

Payment Providers								
Select provider country								
	ProviderS	Logo	Is Active					
	SEB	140	<					
	Swedbank LT Sandbox	۲						
	Citadele LT Sandbox	=						
	Medicinos bankas Sandbox	NUMERON STREET						
	luminor LT Sandbox	Ľ						
	Revolut LT Sandbox	ß						
	Šiaulių bankas Sandbox	46 CJ						
Load Providers								

#### Image 4.4

- Select provider country it can be a main country that is used first, from which providers (banks) are used to accept payments. You can use multiple countries, but one must be selected by default (it represents the first value in our widget / your E-Shop your customers will see). Options list:
  - $\circ \quad \mathsf{FI} \text{-} \mathsf{Finland}$
  - o NL Netherlands
  - o LT Lithuania
- Payment providers payment providers list (based on select country from Payment countries field) with the function to enable/disable payment providers for the E-Shop. It is an optional configuration. If you don't choose any, then your customer is redirected to our widget and selects providers there. If you choose some options, then provider list and logos are represented in your E-Shop and your customer selects providers in your environment. At this moment for Germany provider selection is not possible.

Notices and requirements:

- 1. At least one <u>payment method</u> should be selected. Select a method that is mentioned in your contract.
- 2. If **PIS** <u>payment method</u> is selected, then, at least one <u>payment provider</u> should be selected.
- When "DE" is your configured country, instead of payment providers list in the checkout, customer will see payment option – "ConnectPay", which will allow to freely choose any payment provider.

4. When "**ConnectPay**" is selected, customers will be redirected to **ConnectPay**'s area and there they will be able to search through Germany <u>payment providers</u> and pay via their selected bank.

In the logs tab, all the errors that are encountered from the API will be shown: the ID of the error, the error code which represents the issue, the actual error message, and the date when it was registered (Image 4.5):

## States:

- Initiated ConnectPay Payment Payment initiation request received from Merchant.
- Pending Connectpay Merchant Payment initiation response sent to Merchant.
- ConnectPay Payment In Progress Redirect received from Merchant.
- Processing ConnectPay Payment Payment initiation request sent to Provider.

- Pending ConnectPay Provider Redirect received from Provider OR Payment status update received from Provider, however payment status is not terminal.
- ConnectPay Payment Completed Payment completed.
- ConnectPay Payment Failed Payment failed.
- ConnectPay Payment Abandoned Payment cancelled or abandoned at Provider OR Session expires OR Consumer cancels payment.
- Unknown ConnectPay Payment Unknown payment status update received from Provider.
- ConnectPay Payment Settled Funds has been received in Merchant Account.
- Awaiting ConnectPay Payment Waiting for payment.

## 6. Cron job set up

Last field is for the cron jobs, this field provides the cronjob which can be set in your Prestashop to automatically change the order states, when an order is paid, or the status needs to be changed for e.g. if the order is refunded, or the payment was approved by ConnectPay. To edit or create your own crontab file, type the following command at the UNIX shell / Linux shell / terminal prompt:

#### \$ crontab -e

You need to add bolded line , which you can find below "How to set CronJob for Order State Update." (Image 6.1):

How to set CronJob for Orders State Update.

Set Cronjob for ConnectPay orders state update: \*/5 \* \* \* \* wget https://connectpay1778.invertusdemo.com/en/module/connectpay/updateOrderState?token=db2c1d138627a84539bede6d84f6429a

Image 6.1

Save and close the file.

#### 7. Translations

Module's back office settings, all the error messages, expressions translations can be edited in **International** -> Translations.

When you are in the tab, select type of translation – "Installed modules translations". Select your module – "ConnectPay" Select you language – select the language you want the translations to edit (Image 7.1).

#### International / Translations Translations

ransiation	5					
		i	Here you can modify translations for every line First, select a type of translation (such as "Back	e of text inside PrestaShop. c office" or "Installed modules"), and then select the language you want to translate strings in.

Image 7.2

When you input the translation, be sure to press either "save and stay" or "save" (Image 7.3):

#### 8. Payment preferences and restrictions

You can choose to enable/disable **ConnectPay** for different currencies, customer groups, countries, carriers. These settings can be found in **Payment -> Preferences**. These restrictions are only available when the module is installed. Here you can select in which currency customers can pay using **ConnectPay**, be sure to hit "save", when you checkmark the needed currencies (Image 8.1):

#### € Currency restrictions

Please select available currencies for every payment module.

#### 9. Important notes

**IMPORTANT**: Currently PrestaShop's stock management module does not recognise ConnectPay's order states and for *ConnectPay Payment Failed* or *ConnectPay Payment Abandoned* states you'll need to make these orders as Canceled so that product goes back to stock. You can do this by going to your order, selecting existing status and changing it to "Canceled" (Image 9.1) and pressing "Update status":

SEL	L Orders	Canceled 🗸		Update status	🖶 Print order	
	Orders	Customer				Products (1)
	Invoices Credit Slips	Imag	ge !	9.1		P

#### 10. E-Shop side

Description for E-Shop checkout side. Checkout page with selected **ConnectPay** payment method will look something like this: when **ConnectPay** is enabled, the customer can select the payment method (Images 10.1 and 10.2):

ConnectPay payment

Service is provided by ConnectPay UAB. By using our services, you agree to our Terms of Use and Privacy Policy. ( Terms of Use , Privacy Policy )
