1. Introduction

ConnectPay – Open a multi-currency IBAN account with ConnectPay and forget having to deal with intermediaries. We're the one-stop-shop for all your payment-related needs, with guaranteed security & stability. Hold your funds risk-free.

Unlike traditional banks, we don't invest your money. We hold all funds at the Central Bank of Lithuania – this means that they're available and ready for withdrawal 24/7/365. Lean on the EU's security standards. We're authorized and regulated by the Central Bank of Lithuania and subject to the European Central Bank's regulatory framework. That's multi-level security that we couldn't crack ourselves even if we wanted.

2. Installation guide

Marketplace Installation:

It is required to install the composer first.

You must have your access key to install.

Navigate to My Profile in the Marketplace, then choose Access Keys in My Products section.

Then, you will get a public key and private key to install Magento 2 extensions.

Marketplace link: <https://marketplace.magento.com/>

Installation Steps:

Step 1: Find the extension you want to install and click Technical Details in My Purchase.

Step 2: Navigate to your Magento project directory and update your composer.json file
composer require <component-name>:<version>

Step 3: Run: php bin/magento setup:upgrade

Step 4: Run: php bin/magento setup:static-content:deploy.

Step 5: Clear all Caches.

Archive Installation:

Step 1: Unzip the file

Step 2: Create another directory called app/code/ ConnectPay/Payment/

You can find it in the file in the extension ZIP file you downloaded, look at the node.

This is what you call the directory, then, for example, app/code/ConnectPay/Payment, and you put the contents of the extension ZIP file in there.

Step 3: Upload the directory app/code/ ConnectPay/Payment/ into the root directory of your Magento installation.

All directories should match the existing directory structure.

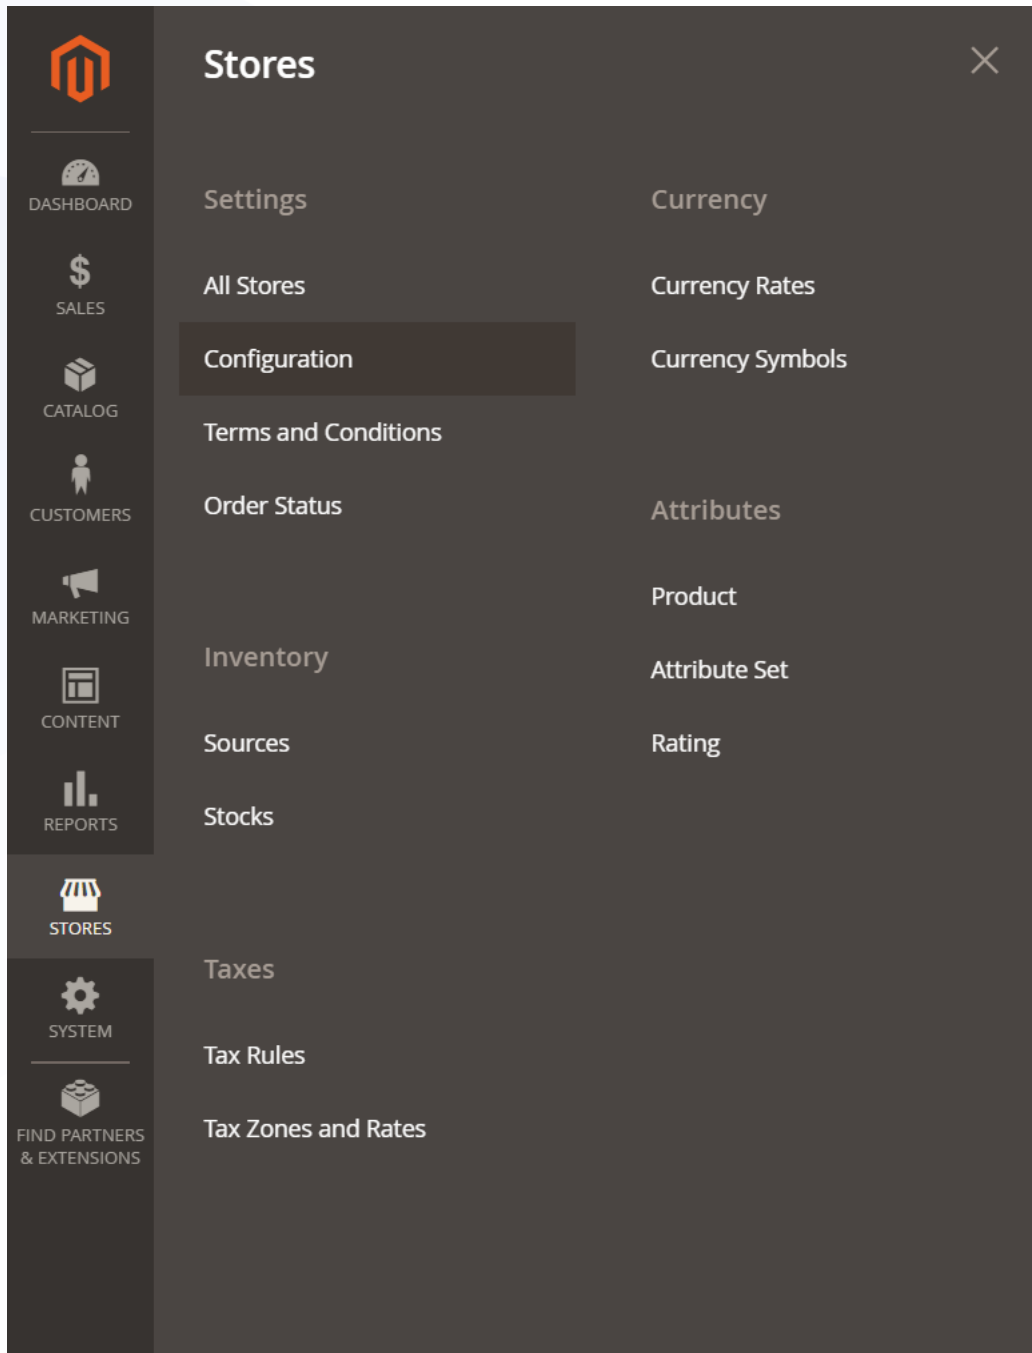

Step 4: Go to Magento 2 root directory. Run: php bin/magento setup:upgrade.

Step 5: Run: php bin/magento setup:static-content:deploy.

Step 6: Clear all Caches.

3. How to find a module in your e-commerce?

After you log in your admin panel, find "Stores" and "Configuration"

Then select "Sales" and then in "Payment methods" find "ConnectPay Payment".

4. How to configure your module?

When you opened our module, please enter your credentials, and configure basic features.

ConnectPay Payment

Enabled [store view] Yes

Title [store view] ConnectPay Payment

Client ID [store view] [REDACTED]

Client Secret [store view] [REDACTED]

Private Key [store view] No file chosen
private.pem Delete File
Only .pem format is allowed.

BrandID [store view] [REDACTED]

Provider Country [store view] Netherlands

Provider Id [store view]

- Revolut
- ABN AMRO
- Triodos
- Rabobank
- ING (Mijn)
- Garantibank
- ASN Bank
- RegioBank
- SNS Bank
- ING Wholesale Banking (InsideBusiness)

Widget UI language [store view] EN Use system value
Allows to specify Widget UI language.

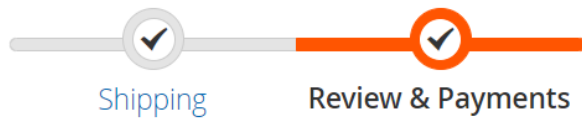

Sandbox Mode [website] Yes

- Enable our module to use it in your e-shop.
- Title – you can change our payment title if you wish or leave it by default “ConnectPay payment”.
- Client ID is provided to you after you sign a contract with us.
- Client secret is provided to you after you sign a contract with us.
- Private key is provided to you after you sign a contract with us, please don’t change the format and upload exactly as you got it from us.
- BrandID is provided to you after you sign a contract with us.
- Provider Country – it can be a main country that is used first, from which providers (banks) are used to accept payments. You can use multiple countries, but one must be selected by default (it represents the first value in our widget your customers will see).
- Provider Id – optional configuration. If you don’t choose any, then your customer is redirected to our widget and selects providers there. If you choose some options, then provider list and logos are represented in your shop and your customer selects providers in your environment. At this moment for Germany provider selection is not possible.

- Widget UI language – you can select default language in the widget.
- Sandbox mode – for production use it must be “No”.

After you save your choices, you must clear all cache in “System” -> Cache management.

If you configure your provider selection in checkout it will look similar like this:

Payment Method

Check / Money order

 ConnectPay Payment

 Revolut

 Triodos

 Rabobank

 ING (Mijn)

 ASN Bank

 Regio Bank
RegioBank

Payment Initiation is provided by ConnectPay UAB. By using our services, you agree to our [Terms of Use](#) and [Privacy Policy](#).

My billing and shipping address are the same

Place Order

5. Order states

When payment is successful, then the order in your e-shop is changed to "Processing".

When payment is unsuccessful (failed or abandoned), then order in your e-shop is changed to "Cancelled".

When payment is not in final state (e. g. waiting for bank's approval), then order in your e-shop is changes to "Pending".

6. Currencies

Currently, ConnectPay supports only EUR currency for Accept Payments service.

7. Support

If you have any questions, how to configure this module, please contact us dev-support@connectpay.com
